

Skipper unit

Product code: Skipper01

Overview

As well as attaching to Skipper's own cones and posts, you can attach the durable, 9m (30ft) retractable Skipper unit to almost any standard traffic cone worldwide. The high-specification materials, including fabric tape and soft-touch areas for improved grip, make the Skipper unit highly robust and dependable. Skipper is the original, market leading solution, and the choice of health and safety professionals across the world.

Key selling points

Product FAQs

Q. What is the retractable tape made from?

A. The tape is made from a high durability, fabric tape (UVA rating 6+).

Q. Can I get it in a different colour?

A. Yes. Skipper is available in orange, red, silver, green blue, and yellow. It's also available with different tape styles. See the customisation page of this document for more information.

Q. Can I get a Skipper unit without the tape?

A. Yes. If you just want to connect a tape end clip to a Skipper unit, you can buy a Dummy unit (product code DUMMY01).
