FOREWORD

Safe manipulation

Using systems connected to AWR-E-03B is advised to be done according to their respective user manuals. This user manual describes correct way to use AWR-E-03B. Check the product condition before use.

To avoid any damage done and losing warranty rights due to unqualified assembly or use:

- use the product only based on this manual;
- comply with all the information regarding safety and maintenance;

You should only let qualified and experienced people use this product and its accessories.

- keep the manual at a place accessible for the user;
- comply with applicable standards;

Never install this product in places:

- with high oxygen concentration;
- with oxidizing agents (for instance nitrous oxide (N₂O));
- with flammable fluid;
- with excessive humidity;

User's Qualification

Person using this device should be able to use common electronic devices and should be trained to use AWR-E-03B in accordance with this user manual.

PLACEMENT OF PRODUCTION LABEL

Information contained in this document can be changed without prior notice. ALIS Tech s.r.o. (further mentioned only as “ALIS Tech”) does not take any responsibility for inaccuracies, missing information, loss, personal or other risk due to wrong use of the device not in accordance with content of this document.

WARRANTY CONDITIONS

Warranty period for this device is 12 months from the date of purchase. Using this device in violation with contents of this makes any warranty rights void.

CUSTOMER SUPPORT

ALIS Tech reserves the right to perform any maintenance on this device.

ASSUMED USE AND BRIEF DESCRIPTION

The device is used to transmit signals, based on which the position and distance from the reading devices is determined. In the event of a threat, it triggers an alert or other defined actions.

Functionality

The device transmits signals, based on which the position and distance of surrounding vehicle tags AWL-E-V3 is determined. Based on a predefined distance from the AWR-E-03B, the vehicle tag AWL-E-V3 sends a signal to decelerate the forklift.

PREPARATION AND INSTALLATION

If the following regulations are not observed, the manufacturer takes no responsibility for any damage. When assembling and using this product please „observe with“:

- National installation and operating regulations;
- National regulations on fire and explosion protection.

For user safety, it is necessary to make sure that the network cable is intact. In many cases, a faulty connection or an unconnected wire will not be recognized right away.

Installation

Installation of this device can only be done by manufacturer, technician trained by manufacturer or a technician under manufacturer's supervision.

1. Connect the adaptor with the unit connector. **(A)**
2. Connect the adaptor to the socket (230 V).

Install the unit with its back on the wall. Connector for the adaptor must face downwards (see the figure).

Schematic connection

DC/DC converter

SAFETY

General safety requirements

- The degree of protection of electrical equipment provided by the cover preventing foreign objects and water from entering the device given by IP code (ČSN EN 60529:1993) must correspond to the specific installation of the electrical device, must be stated in the user manual and on the nameplate of electrical device. The IP code of the device (IP 67) can be found in the operating instructions in the technical data and on the production label.
- Conditions for operation of devices relating to the use of radio frequencies and operation of short-range radio transmitting devices by natural or legal persons are laid down in Act. No. 127/2005 Coll., as amended, and General Authorization No. VO-R / 10 / 05.2014-3 for the use of radio frequencies and for the operation of short-range devices pursuant to Section 10, Paragraph 1 of Act No. 127/2005 Coll.
- Technical requirements for radio equipment are set by NV No. 426/2016 Coll.
- Technical requirements for protection in terms of electromagnetic compatibility are set by NV No. 117/2016 Coll.

Safety instructions

- Keep the device dry and clean.
- Do not place the device on excessively hot or cold surface.
- Clean the device with damp and clean cloth.
- Do not paint the device.
- Do not disassemble or repair the device.
- Do not use the device in places where it could interfere with the operation of other devices, such as air traffic, integrated rescue system, etc.
- Only use accessories supplied by the manufacturer.

REPAIR AND MODIFICATION

The device and its accessories do not contain any parts repairable by the user.

Do not disassemble, modify or repair the device as this can result in harming user, damaging device and its functionality and compromising warranty rights.

This device can only be repaired by manufacturer's or supplier's technician. Manufacturer is not responsible for any injury or damage caused by repair done by anybody else than mentioned above.

MAINTENANCE

Cleaning

Clean the product only by manual rubbing of its surface.

Never submerge the product in liquid also do not rinse with pressurized water.

Risk of electric shock and fire!
Risk of damage or destruction of the product during machine cleaning.
Do not use any flammable or explosive cleaning or disinfecting agents.

Control

Each control unit is tested by the manufacturer for its functionality. After installation of the device, the manufacturer's technician, supplier's technician or technician under the supervision of the manufacturer tests it. The customer confirms the correct functionality by signing the handover protocol.

The manufacturer reserves the right to change the inspection method.

TECHNICAL SERVICE

For service and repair inquiries, contact your supplier or the manufacturer directly.

SPECIFICATIONS

Product specifications

Product name	UWB activator
--------------	---------------

Technical specifications

Dimensions (mm)	65 × 55 × 27
Weight (g)	48
Standard	802.15.4a
Power voltage	DC 5 V
Measuring frequency	0.1 – 20 Hz (adjustable)
Frequency	3.25 GHz – 6.75 GHz
Radiation	-21 dBm/MHz
UWB operating mode	TOF
Effective range	50 m
Temperature	Operating temperature 20 °C – 60 °C Storage temperature -30 °C – 75 °C
Humidity	Operating 0 % – 90 %, without condensation Storage 0 % – 90 %, without condensation
IP code	IP 65

PROPER DISPOSAL OF THE PRODUCT

Disposal of electrical and electronic equipment. This symbol on the product or in its documentation indicates that this product shall not be treated as household waste at the end of its working life. To avoid possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle them with respect to the sustainable reuse of material resources. Home users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can safely recycle this item. This product must not be mixed with other industrial products.

SAFETY MARKING

Meaning:	CAUTION! Clean the transmitter elements before use.
Type:	Marking with safety instruction.
Regulations/ standards:	NV No. 176/2008 Coll. and NV No. 378/2001 Coll.
Dimensions [mm]:	60 x 20 mm
Location:	On device.
Amount:	1
