

Magnetic support bracket

Product code: M/Support01

Overview

The magnetic support brackets hold the Skipper unit in place without the need for cones or posts. The non-marking magnetic version is perfect for attaching the bracket to vehicles and metal shelving. Simply place the bracket onto the desired metal surface, then click the Skipper unit into place on the bracket (use the orange locking clip to locate into the four corresponding holes on the Skipper).

Key selling points

- Attach a Skipper unit to a metal surface without having to use a cone or post
- Holds the bracket securely in place - no risk of falling or slipping off surface

Key features

- Soft pads to prevent scratching to surfaces
- Locking clip which corresponds to the holes on the Skipper unit. Simply squeeze the clip to quickly release the Skipper unit

Product Specifications

Width: 124mm 4.9"	Height: 168mm 6.6"
Depth: 133mm 5.2"	Weight: 275g 9.7oz

The Skipper unit simply clicks into place.

Product FAQs

Q. Can I screw the magnetic support bracket to a wall?

A. The magnetic support bracket can be screwed to walls, but please bear in mind that the magnet is very strong. It is recommended to purchase a wall support bracket if this is the main intention.

Q. Can I attach the tape end clip directly to a wall?

A. If you want to end a line (rather than start a line) at a wall, you can purchase wall or magnetic receiver clips (W/RECEIVER01, M/RECEIVER01).
